Specification
file preparation for laser cutting and engraving

If you want to upload your own drawing for engraving, it must meet the technical requirements

We accept files for engraving:

Save in vector formats: ai, pdf, eps, svg

All text converted to curves

*Minimum text size: 7 pt

(This is only an approximate size and depends on the typeface. In some cases, the size must be verified individually)

## All objects to be engraving:

1. fill in black
2. must be closed objects
3. must not overlap (combine objects)

If you do not combine overlapping objects, the overlapping areas are not engraved

All cutting objects

Stroke red

Mark the objects to be cut with a red outline

Mark the objects to be engraving by filling with black.

If you have questions about the preparation of the file, please contact us.
